## Low Profile

## Polypropylene Vacuum Vent

Very low profile design works great with many ICB's, stackable tanks, etc. Chemically resistant: polypropylene body, Viton® o-ring and 316 stainless spring. 2" MPT. Relieves vacuum starting at 0.5 psi. Good for flow rates to 50 GPM. Won't leak if tank tips over. (*Not a pressure vent: vacuum relief only*). Independently tested by Colorado Engineering.
