

# High Flow Pumps

High flow, high pressure pumps are the ideal choice for pipe cleaning, water jetting, sewer cleaning, hydrostatic testing, tank cleanout and plant washdown. Pumps from *Cat Pumps®*, *General* and *Giant Industries*. All plunger pumps shown feature brass, stainless, aluminum/bronze or nickel-plated manifolds as noted. Triplex ceramic plunger design. Pressure and safety relief valves as well as pulsating valves are available for many models. **Note:** All pumps are standard with **Right Hand** shaft when facing pump manifold or some feature dual shaft design. Left hand models are also available.
