

HYPRO® Ultra Lo-Drift Spray Tips with Dual Air Eduction Technology for Weed Control

Features: ULT Creates Air-Filled Droplets which Significantly Reduce Spray Drift • Wide Spray Angle (120°) • Uniformity at All Pressures (15-115 PSI) • Precision Molded from Durable Polyacetal • Available in Sizes 015 to 08 • Convenient FastCap™ Available • Pressures 15 to 115 PSI • FastCap® complete includes tip, cap, gasket and MiniClean™ strainer for sizes 015-06. Includes EPDM Gasket and 50M screen.

All sizes suitable with PWM spray systems.

Ultra Lo-Drift Max Tips Dual Air-Induction Nozzle for Maximum Drift Control

- Pentair Hypro designed one of the most effective drift reducing nozzle, providing up to 95% drift reduction. Based on internal droplet sizing of % droplets.
- This nozzle can operate at a wide range of operating pressures while maintaining consistent droplet size for greater flexibility when applying Dicamba and 2, 4-D. The 130° spray angle allows for optimal pattern overlap and coverage at lower boom heights.
- FastCap version utilizes the SnapLock cap technology.
- Compact robust footprint designed to not break easily when hitting crops or the ground.
- Ultra Lo-Drift Max is the ideal nozzle for post-emergence herbicide applications where drift reduction is paramount.
- Nozzles include strainer and EPDM gasket.

All sizes suitable with PWM spray systems.
