Highway Warning Triangle

2191 Warning Triangles. Hi-intensity reflex areas front and back reflect headlights at night. Constructed of hermetically sealed, high-visibility, fluorescent orange plastic strip reflectors. Impervious to dust & moisture. Interior strips of molded fluorescent plastic provide effective warning for daytime use. Dimensions including base are 17-3/4"W x 16-1/4"H. Weighted base rotates 90° to prevent triangles from blowing over in wind or highway turbulence. Design meets FMVSS 125 Specifications and SAE-W4-74 DOT. Set of 3 triangles packed in a molded storage case.
