

E1496 Udor 12 Volt Softwash Diaphragm Pumps

UDOR KAPPA Series Diaphragm Pumps are an excellent choice for spraying, misting, de-icing, hydrostatic testing, fluid transfer, and soft wash. All models feature GreenTech diaphragms designed to withstand harsh conditions, offering superior resistance to temperature variations and exceptional chemical compatibility (Buna-N diaphragms optional).

With a compact and durable design, these pumps are maintenance friendly and only need 4 oz. of oil for proper lubrication. All models are constructed from anodized aluminum and include a built-in pulsation dampener (inlet filter and regulator sold separately).

Pumps are equipped with a 12-Volt DC Electric Motor. High pressure (HP) models feature HD motors rated up to 200 PSI max @ 35 Amps.

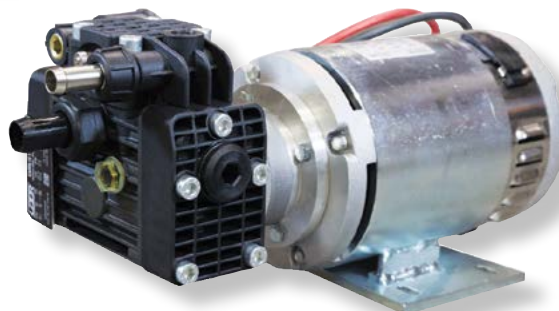

Hose Barb ports are 3/4" Inlet, 3/8" Outlet, 5/8" Bypass.

Note: Pumps are designed for a maximum percentage of soft wash solutions. **Call for Details.** All pumps used in soft wash applications must be completely rinsed after use.
