NEW Fuel Transfer Hose Reels

FILL-RITE Fuel Transfer Hose Reels

Complete with Hose & Automatic Nozzle

***Fill-Rite* Fuel Transfer Hose Reels** keep discharge hoses neatly stored between fueling jobs, helping reduce trip hazards and protect hoses from equipment traffic. The spring rewind system retracts the hose after use, while an adjustable guide arm and integrated rollers and swivel joint help the hose pull out smoothly without twisting or kinking.

Corrosion-resistant construction, protective plates and a solid steel anchoring base provide durable, stable hose storage. Adjustable spring tension lets operators fine-tune retraction to their preference. Each complete reel system includes a black fuel transfer hose, hose stop, and automatic diesel shut-off nozzle with a green cover. Available in 25-, 35-, and 50-foot hose lengths with ¾" or 1" NPT outlet/inlet connections.
