

Band Lock Style Vacuum Couplers

Galvanized or Black Steel Couplers for use with vacuum system applications. These fittings are also used to replace worn or broken ends on vacuum tubing. Available in male or female styles as shown. Use with BandLock style clamps as Circle Lock fittings and/or clamps are not compatible. Fittings are Press-In style, galvanized steel unless otherwise noted. Gaskets not included.

MALE

Part No.	Size	Style
KR STRBL4M	4"	Male
KR STRBLB4M	*4"	Male
KR STRBL6M	6"	Male
KR STRBLB6M	*6"	Male
KR STRBL8M	8"	Male
KR STRBLB8M	*8"	Male

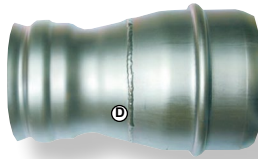

* Black Steel Weld-On Fittings.

FEMALE

Part No.	Size	Style
KR STRBL4F	4"	Female
KR STRBL6F	6"	Female
KR STRBL8F	8"	Female

Band Lock Style Vacuum Reducers/Increasers

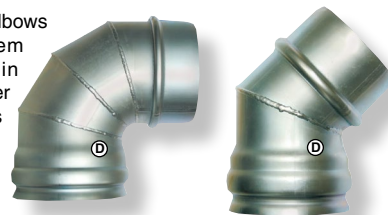

Galvanized Steel Vacuum Reducers for use in vacuum system applications. Can be used with hose or steel/aluminum tubing. Use with BandLock style clamps as these fittings are not compatible with Circle Lock clamps or fittings. These are Press-In fittings. Gaskets not included. **Not Returnable.**

Part No.	Size	Style
KR SK17170604	6" Male x 4" Female	Reducer
KR SK17170806	8" Male x 6" Female	Reducer
KR SK17190406	4" Male x 6" Female	Increaser
KR SK17190608	6" Male x 8" Female	Increaser

Band Lock Style Vacuum Elbows

Galvanized Steel Vacuum Elbows for use in vacuum system applications. Available in Galvanized Steel and in either 45° or 90° options. Gaskets not included. **Not Returnable.**

90° Style

45° Style

Part No.	Size	Style
KR SK170504	4"	45°
KR SK170506	6"	45°
KR SK170508	8"	45°
KR SK170704	4"	90°
KR SK170706	6"	90°
KR SK170708	8"	90°

Band Lock Style Vacuum End Plugs & Caps

These vacuum fittings are galvanized steel and designed to be used in a variety of vacuum applications where Band Lock style fittings are present. Plugs are "male" configuration while Caps are "female" configuration and include a gasket. These are Press-In fittings. **Not Returnable.**

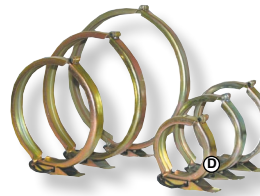

Plug

Cap

Part No.	Size	Style
KR SK171304	4"	Plug
KR SK171306	6"	Plug
KR SK171308	8"	Plug
KR SK171504	4"	Cap
KR SK171506	6"	Cap
KR SK171508	8"	Cap

Band Lock Style Clamps & Gaskets

Designed for use with vacuum fittings. Hinged style clamp ensures tight fit. Gaskets are not included. Gaskets function well in vacuum applications, however, in pressure applications they will not provide 100% positive seal.

Part No.	Style	Size
KR STRBLC4	Clamp	4"
KR STRBLC6	Clamp	6"
KR STRBLC8	Clamp	8"
KR ITE-14	Gasket	4"
KR ITE-16	Gasket	6"
KR ITE-18	Gasket	8"

Vacuum Coupler Set with Gasket

These **Band Lock Style Vacuum Fittings** are galvanized steel and designed for use in various vacuum applications. The set includes a female coupler (with gasket) and a male fitting. The fittings are Press-In unless otherwise noted.

Part No.	Description
KR STRBL4	4" Coupler Set, Galvanized, Press-In.....
KR STRBLB4	4" Coupler Set, Black Steel, Weld-On.....
KR STRBL6	6" Coupler Set, Galvanized, Press-In.....
KR STRBLB6	6" Coupler Set, Black Steel, Weld-On.....
KR STRBL8	8" Coupler Set, Galvanized, Press-In.....
KR STRBLB8	8" Coupler Set, Black Steel, Weld-On.....

Band Lock Style Vacuum Line Tees

These vacuum fittings are designed for a variety of vacuum system applications. Gaskets not included. **Not Returnable.**

Part No.	Size
KR SK172304	4"
KR SK172306	6"
KR SK172308	8"

Band Lock Style Vacuum Breaker

Vacuum breakers are designed to be used in numerous vacuum applications where the system requires vacuum to be broken. As the name suggests, it is designed to "break" the unwanted vacuum inside a closed system. Vacuum breakers are important as they safeguard the piping by allowing air to fill the vacuum. They help protect the plumbing system against water hammer and freezing. Gaskets not included. **Not Returnable.**

Part No.	Size
KR SK173104	4"
KR SK173106	6"
KR SK173108	8"
