

High Pressure Pumps

AR Plunger Pumps are designed for a wide variety of industrial cleaning, car/truck wash and pressure wash applications. Available in pulley or direct drive for electric motor or gas engines.

Standard Features Include: High strength, forged brass manifolds • Aluminum oxide ceramic plungers • Stainless steel valves, seats and springs • Continuously lubricated seals and V-packings • Triple lip oil seals • Extra long connecting rods made from a special alloy • Die-cast aluminum crankcases with oversized cooling fins • Premium bearings for exceptional load support • Maximum 140° F. (185° F. available in some series) • Ports on most pumps are 1/2" inlet by 3/8" outlet • Large flow pumps have larger ports • Rails are not included and must be ordered separately if needed.
