

Many Masport vacuum pumps are offered in package systems identified as Pro Pack and/or Pro Pack Plus (Complete). Both options have a Honda engine (electric start) as the drive option (other engine drive options available – call for specifications) pump packages which are mounted onto a base plate. The Pro Pack is a basic system that includes vacuum pump, electric start Honda engine, battery, and remote-mounted oil reservoir. The designation of the “Complete” or the Pro Pack “Plus” system(s) identifies all basic system components with the addition of pressure and vacuum relief valves, pressure/vacuum gauge, inlet filter, scrubber, and separator/muffler – unless otherwise noted. Please call with specifications for more product inquiries – not all available product options are listed. 1-Year performance warranty on Masport vacuum pumps.

Pro Pack 750/1000

MASPORT
VACUUM PUMP SYSTEMS

Pro Pack 750 - HXL2 Pump

The **Masport Pro Pack 750** is the entry-level unit for their Pro Pack series. This unit has an air-cooled HXL2V vacuum/pressure pump direct driven by a 5.5HP electric start Honda gas engine. The inlet/outlet pump ports are 1-1/2" FPT. Vane flush port is 1/4" FPT. A major benefit of a direct drive unit means no belt squealing, slip or replacing. Designed for tank sizes up to 750 gallons.

- Maximum of 75 CFM
- Continuous Vacuum Rating: 20"
- Continuous Pressure Rating: 5-10 PSI

Part No.	Description	Wt.
MA 750-PP	HXL2V, 5.5 HP Honda, Direct Drive	215 lbs.
MA 750-PPC	HXL2V, Complete, 5.5 HP Honda, Direct Drive ...	275 lbs.
