## Locking Swivel Cam & Groove Couplers

**Locking camlock swivel couplings** are suitable for dry bulk, tank truck, metal hose assemblies, and other product transfer applications. The cam and groove swivel fittings feature a live swivel capable of 360-degree rotation under pressure. A Buna X-ring seal and gasket at the swivel reduces friction and increases stability in dynamic applications. Locking swivel couplings are constructed of high-grade aluminum for a wide array of chemical compatibility. All sizes are also available in 316-stainless steel. Coupler-style fittings include EZ Boss-Lock locking cam arms for secure connections. Buna seals/gaskets standard (Viton® also available). **Operating Pressures:** 2" is 250 PSI; 3" is 125 PSI; & 4" is 100 PSI.
