

Spin-On Fuel Filters

FILL-RITE

Fill-Rite Fuel Filters are available in a wide range of options to ensure your fueling systems stay in peak condition no matter your application.

Elements come in two different styles:

- **Particulate Filters:** Remove dirt, rust, and microbial growth contaminants from fuel supply before they work their way into your equipment.
- **Hydrosorb® Filters:** Best filtration – capture particulates and restrict flow when excess water is detected, thereby alerting you that your attention and element replacement is required.

Filters are standard in 10 Micron elements (some 30 Micron options available) and feature a spin-on design for quick, easy installation and replacement. All filter elements and filter head housings are sold separately unless otherwise noted.

For gasoline and diesel fuels – **Not for aviation fuels.**

F1810PMO

F1810HMO

700ACCF7017
1" Aluminum Head ONLY

1200KTG9075
3/4" Cast Iron Head w/ 7" Nipple

F1810PMO / F1810HMO provide microscopic filtration and water separation protecting fuel systems with flow rates up to 25 GPM. Ideal for farm, construction, and mobile service applications. **Size is 8.8" tall x 3.8" in diameter.** Equivalent to Cim-Tek 260 series.

F4010PMO / F4030PMO & F4010HMO / F4030HMO are specifically made for higher-volume applications such as service stations, truck stops, and other commercial fueling setups. Designed to handle flow rates of gasoline and diesel fuels up to 40 GPM. **Size is 10.9" high x 5.1" in diameter.** Equivalent to Cim-Tek 800 series.

Part No.	Micron	Membrane	Filter Thread	GPM
FR F1810PMO	10 Micron	Particulate	1"-12	25
FR F1810HMO	10 Micron	Hydrosorb	1"-12	25
FR F4010PMO	10 Micron	Particulate	1-1/2"-16	40
FR F4010HMO	10 Micron	Hydrosorb	1-1/2"-16	40
FR F4030PMO	30 Micron	Particulate	1-1/2"-16	40
FR F4030HMO	30 Micron	Hydrosorb	1-1/2"-16	40
FR 1200KTG9075	3/4" Cast Iron Filter Head, F1810 Series			
FR 1200KTG9100	1" Cast Iron Filter Head, F1810 Series			
FR 700ACCF7017	1" Aluminum Filter Head, F4010/F4030 Series			

Note: Hydrosorb filters okay for up to 25% ethanol.

Fuel Filters

Complete Filter Kits

FILL-RITE

Part No.		<u>Inlet/Outlet</u>	<u>Filter Thread</u>	<u>GPM</u>
FR 1200KTF7018	Particulate Filter Kit	3/4"	1"-12	25
FR 1210KTF7019	Hydrosorb Filter Kit	3/4"	1"-12	25

Compact Spin-On Filters

F200 Series - 25 GPM

FILL-RITE

F2500 Series spin on fuel filters deliver the same high-quality design and performance as Fill-rite's other 25 GPM fuel filters (F1810PMO & F1810HMO) – but in nearly 40% more compact size. Ideal for installing into smaller spaces and compact systems. Size is 5.4" x 3.8" in diameter. For gasoline and diesel fuels only. **Not rated for aviation fuels.** Equivalent to Cim-Tek 300 series.

F2510PMO

F2510HMO

Part No.	Micron	Membrane	Filter Thread	GPM
FR F2510PMO	10 Micron	Particulate	1"-12	25
FR F2510HMO	10 Micron	Hydrosorb	1"-12	25
FR 1200KTG9075	3/4" Cast Iron Filter Head & Nipple			
FR 1200KTG9100	1" Cast Iron Filter Head			

Note: Hydrosorb filters okay for up to 25% ethanol.

Clear Bowl Fuel Filters

F1800 Series - 18 GPM

FILL-RITE

F1800 Clear Bowl Series fuel filters are equipped with an alcohol-resistant clear plastic bowl for easy viewing of filter condition and fuel flow. **F1810PC1** includes a 10 Micron particulate element, while the **F1810HC1** has a water detecting Hydrosorb® element. Bowls are equipped with a simple sediment drain valve. Filter head inlet and outlet are 1" FPT. Rated to 18 GPM. **Size is 10.5" tall x 4.5" in diameter.** **Not rated for aviation fuels.** Equivalent to Goldenrod 495 and 496 series.

F1810PC1
