

Tru-Kleen™ Double & Triple Chemical Inductors are designed for handling both dry and liquid materials, offering versatility and efficiency for all your chemical handling applications. These multi-tank inductor systems utilize a venturi system to inject chemical solutions directly into the water supply line leading to the product tank, protecting the pump from harmful chemicals.

Systems are available in configurations of 30-, 40-, and 65-gallon inductors. Multiple sizes of tanks can be plumbed together for custom needs. Each Tru-Kleen™ inductor features a 2" male threaded outlet molded directly into the bottom of the tank, ensuring complete drain out of all chemicals and liquids. Features 16" lids and plumbed with 2" or 3" Banjo manifold system and valves. Standard with anti-vortex plate and cone-rinse system in all tanks. Double and Triple inductors are bolted to a corrosive resistant steel skid for efficient moving and placement on a trailer bed.

Features

- 30-, 40-, and 65-Gallon Tru-Kleen™ Inductor Tanks
 - Double & Triple tank configurations
 - Banjo 2" or 3" manifold system and plumbing
 - Molded 2" MPT outlet "snout" design for complete drain
 - Anti-vortex plate (Fig. A) & Cone Rinse (Fig. B) standard pre-installed
 - Jug Rinse (One standard on each system*)
 - Banjo 2" or 3" manifold system and plumbing
 - 16" vented lids and 1-gallon increment markers
 - Steel skid, alkyd painted for corrosion protection
 - Optional add-ins include extra Jug Rinse (Fig. C), Chem-Blade, & Agitation Nozzle
- (*Specify accessory and tank location at order)
