

Big Johns Car Wash location at 6911 S 41st Ave Bellevue NE

JE Adams 9210 LD Vacuums w/CryptoPay swipe

QUICK, EASY & INEXPENSIVE UPGRADE

This Big Johns location is a 6 bay self-serve car wash using Dultmeier built equipment, 4 JE Adams 9210 LD vacuums bought as quarters only and no display, and 1 JE Adams 29000 vacuum with shampoo and spot remover bought with bill acceptor. This is a 1980's built wash that had never had any upgrades and very little maintenance done to it until we bought it two years ago.

Our latest advance was finding an inexpensive way to accept credit cards in our self-serve bays and vacuums. Thanks to JE Adams engineers and sales team we were able to change the face plate on our existing Vacuums adding Dixmor LED 6 Timers to give us displays. We then added the Genesys CryptoPay secure wireless controller in the pumproom and credit card swipes in each bay and on each vacuum that created a secure wireless mesh network at our location just by connecting the 2 wires that come with each credit card swipe to the timers. This was so easy and inexpensive that I do not know why no one thought of this before. In one afternoon, we were up and running accepting credit cards with no hassle or configuration, it was all plug and play. Customers love that all their transactions for a visit are consolidated into one charge, no matter how many times they swipe their card or push the button to add time. Dultmeier Sales was our source for the CryptoPay system and the other parts for this upgrade.
