

## TT006

---

### **John Deere Starter Fertilizer Placement Tube Part #TT-006 (Patented)**

This simple yet effective design is totally protected by the disc blades, so rocks should not be an issue. The 1/8" wall 3/8" stainless tube will easily outlast the disc scraper. The optional seed bounce flap closes the opening between the disc openers assuring correct seed placement by eliminating seed bounce and ricochet.

#### **Key Benefits**

- Starter Fertilizer application deeper in the soil profile
- Instant root uptake for early plant health
- Maintenance free

#### **Installation Instructions:**

1. Remove depth gauge wheels and disc openers, making sure to note correct shim placement
2. Remove stock seed tube guard
3. Install new Totally Tubular part #006
4. Bend centering tab against row shank
5. Tap centering tab with mallet to firmly hold tube centered
6. Re-install disc openers, making sure you have correct shim placement
7. Return "new only" factory scraper to dealer for a \$7.00/row manufacturer refund

**Recommend replacing disc openers when you put our fertilizer tubes on.**
